

VALSER SERVICES SDN BHD

(809516-H)

COMPANY PROFILE

VALSER SERVICES SDN. BHD.

Established in 2008, Valser Services supports the Valser Group with specialized onsite solutions, including actuator, piping, and valve supply, servicing, maintenance, and comprehensive asset management. Backed by factory-trained personnel and a full range of site tools, Valser delivers high-quality valve servicing and repairs, earning recognition from industry leaders like PETRONAS, SHELL, and TENAGA NASIONAL BERHAD for work on both offshore and onshore facilities.

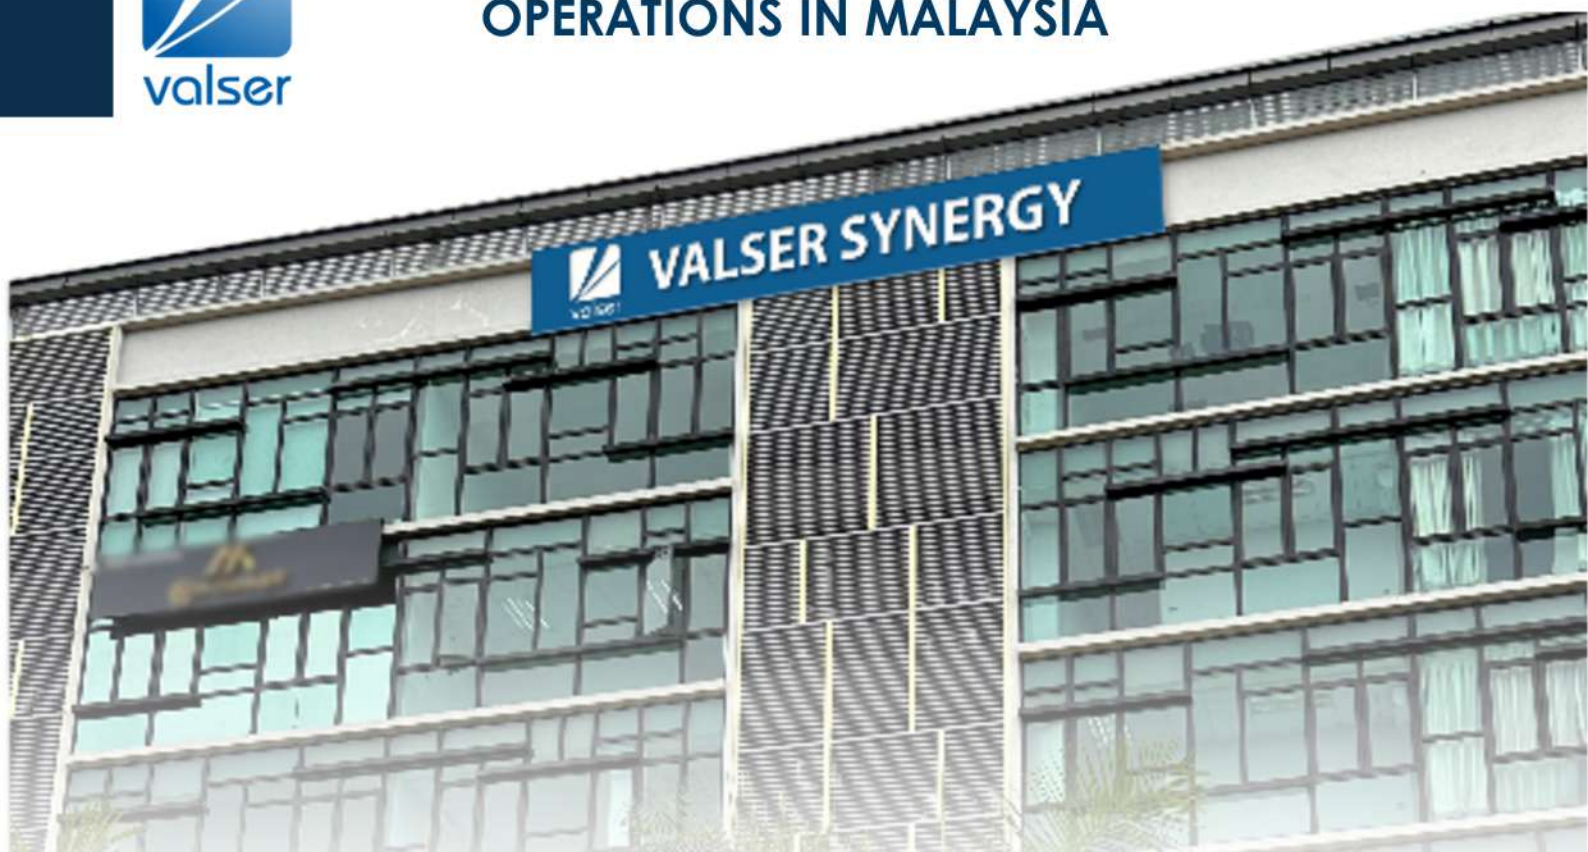

Vision

To be the leading One-Stop Centre for Flow Control Solutions and Power & Energy Systems through sustainable and innovative solutions.

Mission

- To provide engineering expertise and innovative products & solutions to our clients.
- To provide our clients with unparalleled service and support, fostering long-term partnership built on trust, integrity and reliability.
- To ensure cost-effective and on-time deliveries whilst maintaining the highest quality, standards and workmanship.

CORPORATE HEADQUARTERS

Our corporate headquarters houses the Management, Engineering, Project Management, Sales & Marketing, Finance, Human Resources, Corporate Planning, and Administration departments.

VALVE AUTOMATION & SERVICE CENTRES

As a One-Stop Solution Centre for valve manufacturing, supply, and servicing in Malaysia and the Asia-Pacific, we have integration facilities in Bandar Serenia, Teluk Kalong, Bandar Penawar, Bintulu, Labuan, and Pengerang.

Our state-of-the-art facilities house operations, production, and service teams under one roof, with assembly, manufacturing, testing, and warehousing areas featuring high-lifting capacities (up to 35 tons) to enhance productivity, quality, and safety.

Valve and Actuator Maintenance

Valser Services delivers complete valve and actuator maintenance for onshore and offshore sites. Backed by over 15 years of AVS expertise, our team offers in-situ repairs, soft part replacements, testing, and refurbishment - performing detailed inspections to identify necessary repairs.

Our expertise spans a wide range of valve types:

- Ball Valves
- Control Valves
- Gate Valves
- Globe Valves
- Butterfly Valves
- Pressure Safety Valves
- Pressure Vacuum Valves

And actuator systems, including:

- Pneumatic
- Hydraulic
- Gas-over-Oil
- Electric (for MOVs)

To ensure top-tier service, Valser Services follows industry standards and customizes solutions to client needs. Valve preservation services help prevent corrosion and contamination, supporting long-term storage or seaworthy transport.

Actuator Retrofitting

Retrofitting replaces outdated or faulty actuators to maintain performance and compliance, often due to:

- Actuator damage
- Undersizing
- Obsolescence
- SIS compliance

Valser Services offers engineering consultations to ensure actuators are properly sized for existing valves, with on-site torque verification aligned to manufacturer specs for accurate selection.

SPECIALISED SERVICES

Fugitive Emission Test (FET)

The Alcatel Adixen 124 helium leak detector, with a sensitivity range of 10^{-11} atm.cc/s, is utilized to conduct FET, ensuring valve compliance with industry standards such as ANSI.

Torque Measurement

The Norbar PT11 and PT1A equipment enables precise torque measurement, allowing users to validate manufacturer specifications for improved actuator selection.

Blasting & Painting

Facilities include painting capabilities that meet offshore specifications and industry requirements.

Positive Material Identification (PMI)

The Niton Analyzer XL3T 800 is used to analyse material composition, verifying whether valves and actuators meet specification requirements. PMI is also applicable to related equipment, such as piping (for butt weld joints) and flanges, ensuring accurate gasket selection.

.....

Troubleshooting

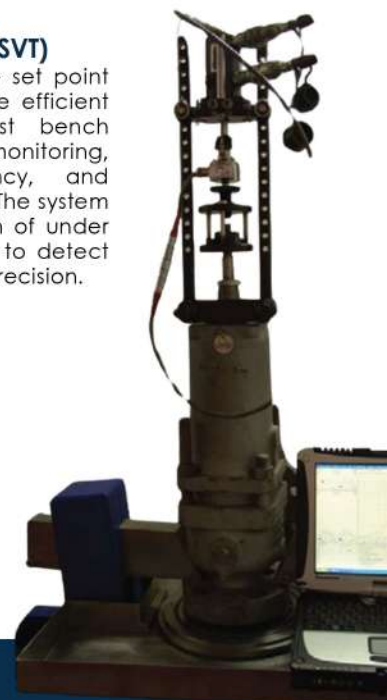

Experienced engineers, supervisors, and technicians provide on-site troubleshooting for valve and actuator issues. Supported by internal and external engineering expertise, operational, mechanical, and instrumentation problems are diagnosed and resolved efficiently.

Online Safety Valve Testing (OSVT)

OSVT determines the safety valve set point while in service, providing a more efficient alternative to conventional test bench methods. It enables condition monitoring, reduces maintenance frequency, and minimizes shutdown-related costs. The system ensures a test accuracy deviation of under 3% and uses an ultrasonic sensor to detect the "start-to-leak" point with high precision.

Hydraulic Torquing

The Torqlite IU-10XK & IU 3XL hydraulic torquing equipment ensures precise torque application during valve and actuator assembly, preventing quality issues and ensuring optimal performance.

MAJOR EQUIPMENT

Gate, Globe & Safety Valve Lapping Machines

Valser Services' in-situ valve regrinding services eliminate the need for dismantling, minimizing downtime, production losses, and costs while ensuring smooth operations.

Valve Lubrication & Sealant Injection

Valser Services provides high-pressure valve lubrication and sealant injection using advanced equipment and skilled personnel. This service is performed without dismantling to ensure efficient maintenance and pipeline integrity. Periodic maintenance programs enhance valve performance, longevity, and reliability.

MAJOR EQUIPMENT

Safety & Control Valve Servicing and Testing

Valser Services has a highly skilled workforce specializing in Safety Valve and Control Valve servicing, testing, and lapping. Our Computerized Pressure Testing accurately determines the safety valve set point, while our Computerized Control Valve Seat Test assesses the control valve's leakage rate.

Our mobile test benches are equipped with Valve Testing Software, allowing seamless data collection and report generation, available in both softcopy and hardcopy formats.

Valve Testing Equipment

Valser Services' team is fully trained to perform comprehensive valve and actuator testing, ensuring high-quality performance verification for all types of industrial valves.

Our Testing Equipment

Equipment	Valve Size And Class Range	Quantity
1. Hydrostatic Test Machine	From 4" 2500# to 46" 600#	3 Units
2. Hydrostatic Test Machine	From ½" 150# to 10" 900#	4 Units
3. Control Valve Test Machine	From ½" to 6"	6 Units
4. Safety Valve Test Machine	From 1 ½ to 16"	6 Units
5. Overhead & JIB Crane	3 to 35 tonnes	15 Units
6. Valve Torque Tester	Up to 20,000 NM	3 Units
7. Online Safety Valve Testing (OSVT)	150 – 2500#	2 Units
